PARTNERS

YASO EMMANUEL

GIANLUCA LUCCHESI

CHRISTOPHER YOUNG

Draft Programme

08:00- 08:30 Registration

08:30-08:40 – Welcome and Introduction

Session 1: Planning considerations in aortic valve and root intervention

Chairs: Dr Yaso Emmanuel and TBC

08:40-09:00 Timing of AVR in Chronic Severe Aortic Regurgitation

Prof John Chambers

09:00 – 09:20 Imaging of the aortic valve and aorta for surgical planning

Dr Ronak Rajani

09:20-09:40 What is the role of MRI in Aortic valve disease assessment?

Dr Dan Sado

09:40-10.10 When to intervene before and during pregnancy

Dr Sara Thorne

10:10-10:30 Timing of aortic valve surgery in endocarditis

Dr Rajan Sharma

10:30-10:45 Panel discussion and Questions

10:45-11:00 Tea and Coffee

Session 2: Valve Conserving approaches in Aortic Root Disease

Chairs : Dr Christoph Nienaber and TBC

11:00-11:20 Valve repair and outcomes

TBC

11:20-11:40 Valve sparing aortic root replacement and outcomes

TBC

11:40-12:00 PEARS procedure and outcomes

Mr Conal Austin

12:00-12:20 Indications and timing of aortic root surgery in aortopathies

Dr Yaso Emmanuel

12:20-12:35 Panel Discussion and Questions

12:35 – 13:15 Lunch

Draft Programme

Session 3: The menu of options in Aortic valve replacement

Chairs: Dr Ronak Rajani and Mr Caner Salih

13:15-13:35 Minimally invasive approaches to the aortic valve

Mr Gianluca Lucchese

13:35-13:55 Tissue AVR – advances in technology

Mr Chris Young

13:55 – 14:15 Mechanical AVR advances in technology and anticoagulation

Mr Michael Sabetai

14:15-14:35 ROSS procedures – techniques and outcomes

Prof David Anderson

14:35 – 14:55 TAVI in young patients

Prof Simon Redwood

14:55-15:10 Panel discussion and questions

15:10- 15:30 Tea and coffee

Session 4 – Cases

Case 1 – 50 yr old male with severe AS -

Case 2 – 25 year old male – severe AR, mildly dilated LV with normal function and CPET, asc Ao 4.0cm

Case 3 – 42 yr old female 11 year old 21mm Perimount, moderate stenosis- wants IVF and pregnancy

Case 4 – 35 yr old female – previous AV repair x2, then tissue AVR now severely stenosed

Case 5 – 30 year old Marfan syndrome aortic root 4.2cm, family history of aortic dissection

Case 6 – 40 yr old aortic root aneurysm 5.2cm, trileaflet valve and genetic testing negative

Case 7 – 45 year old with Marfan and severe MR requiring surgery, normal aortic diameters – for PEARS or not?

16:50 – 17:00 Closing remarks

17:00 Meeting close

RCP CPD accreditation applied for

Subsidised registration, full details will be available shortly
