[ANDLymph/ National Association of Sufferers of Lymphatic Disorders](#)

ANDLymph/ National Association of Sufferers of Lymphatic Disorders aims to improve throughout Portugal the knowledge of lymphatic disorders and related illnesses. The several actions that the Association intends to develop are intended to make available to sufferers and their families a multi-disciplinary network of support and quality care within an economically responsible framework, as well as developing synergies which encourage greater visibility and acceptance of lymphatic disorders in society and the community and are aimed at improving quality of life.
