VASCERN
THE EUROPEAN REFERENCE NETWORK ON RARE MULTISYSTEMIC VASCULAR DISEASES

- Hereditary Haemorrhagic Telangiectasia (HHT)
- Heritable Thoracic Aortic Disease (HTAD)
- Medium Sized Arteries (MSA)
- Pediatric and Primary Lymphedema (PPL)
- Vascular Anomalies (VASCA)

www.vascern.eu

Co-funded by the Health Programme of the European Union
The European Reference Networks (ERNs) gather highly-specialized expert centers across Europe to improve the management of all patients with rare diseases by providing accessible cross border healthcare. VASCERN is the European Reference Network on Rare Multisystemic Vascular Diseases.

Guidelines and expert consensus statements for the medical community

Do’s and Don’ts factsheets that alert medical professionals to the unique needs of rare disease patients in frequent situations

Clinical outcome measures used to identify healthcare providers of good care and to encourage care improvement

Pills of Knowledge / short educational videos

Encourages collaborative research

Develops registries

VASCERN produces and translates valuable documents and media for both patients and healthcare professionals.

We offer cross-border virtual consultations using the Clinical Patient Management System (CPMS), where complex cases can be discussed with the experts of our Network.

How are patients involved in VASCERN?
The patient’s needs are a priority for VASCERN and the patient advocates work hand in hand with VASCERN’s medical professionals.
VASCERN
Gathering the best expertise in Europe to provide accessible cross-border healthcare to patients with rare vascular diseases
